---

Dedicated and detail-oriented computer science junior student with a solid background in computer programming, problem-solving, and teamwork. I'm excited to use my technical expertise and love of solving problems to contribute to creative projects and obtain real-world experience. Looking for an internship or entry-level job where I can contribute significantly to a dynamic team and organization while learning and developing.

SKILLS

Programming Languages

HTML
CSS
PHP
C
MYSQL
RaspberryPi

Libraries & Framework

React.js
Node.js
Tailwind CSS

Tools & Platforms

Git
GitHub
Vercel
Figma

PROJECTS

Current Website Portfolio - on progress

- Developed a personal portfolio website using Vite, React, and Tailwind CSS
- Designed a clean, responsive layout to showcase projects, skills, and contact information
- Structured components for easy updates and future feature expansion
- Live site: Portfolio

POS system

- Built a network-based cashier web app simulating a real POS system for cafés and small shops.
- Implemented item selection, quantity control, cart management, and transaction handling.
- Developed with HTML, CSS, and JavaScript, structured for future backend integration and multi-device support.
- GitHub: PosSystem

Juris.js Website timer

- Built a multi-timer web app with HTML, CSS, JavaScript, and Juris.js.
- Timers can be created, started, paused, reset, deleted, and persist via Local Storage.
- Features real-time updates, dynamic UI, and notifications with sound.
- GitHub: JurisTimer

First Website Portfolio

- Personal Portfolio Website
- Built a fully responsive portfolio to highlight my projects, skills, and career journey.
- Designed with a modern, user-friendly interface using HTML, CSS, and JavaScript.
- Showcases clean design, interactive features, and seamless deployment on GitHub Pages.
- Live site: justinwangsa.github.io

Web-Based Inventory Management System

- Developed an IoT-based system on Raspberry Pi integrating sensors with a MariaDB database.
- Designed and implemented efficient database schemas to store and manage real-time data.
- Optimized data flow between hardware and database for reliable performance.
- Showcases hands-on experience with hardware–software integration, SQL, and open-source tools.
- GitHub: Inventory System

Open Source Project

- Developed a web page showcasing stinky tofu, including its history, recipe, and an embedded YouTube video.
- Implemented structured HTML, styled with CSS, and enhanced interactivity with JavaScript.
- Demonstrates practical experience in front-end development, responsive design, and content presentation.
- GitHub: Project

WORK EXPERIENCE
