

JUSTIN WANGSA

+886 955 434 937 | justinwangsa9@gmail.com | [LinkedIn](#) | [GitHub](#)

Dedicated and detail-oriented computer science senior student with a solid background in computer programming, problem-solving, and teamwork. I'm excited to use my technical expertise and love of solving problems to contribute to creative projects and obtain real-world experience. Looking for an internship or entry-level job where I can contribute significantly to a dynamic team and organization while learning and developing.

PROJECTS

Current Website Portfolio

- Developed a personal portfolio website using Vite, React, and Tailwind CSS
- Designed a clean, responsive layout to showcase projects, skills, and contact information
- Structured components for easy updates and future feature expansion
- Live site: [Portfolio](#)

POS system

- Built a network-based cashier web app simulating a real POS system for cafés and small shops.
- Implemented item selection, quantity control, cart management, and transaction handling.
- Developed with HTML, CSS, and JavaScript, structured for future backend integration and multi-device support.
- GitHub: [PosSystem](#)

Web-Based Inventory Management System

- Developed an IoT-based system on Raspberry Pi integrating sensors with a MariaDB database.
 - Designed and implemented efficient database schemas to store and manage real-time data.
 - Optimized data flow between hardware and database for reliable performance.
 - Showcases hands-on experience with hardware–software integration, SQL, and open-source tools.
 - GitHub: [Inventory System](#)
-
